Breast Health

An Initiative with Prashanti Cancer Care Mission

Patient Name: ACHARYA VIDHI	Patient ID: 318/05/2017
Patient Age: 32 Y / F	Referring doctor: DR. C. B. KOPPIKER
Date of examination: May 9, 2017	Examination: ULTRASOUND

Breast Ultrasound Report

Indication:

- K/C/O granulomatous mastitis.

On targeted ultrasound of left breast:

Multiple oval, encapsulated collections are seen in the left breast at 10 – 12 'o' clock positions.

The largest at the 12 'o' clock per areolar region measures 23.8 x 14.0 mm.

It shows a solid appearance with few cystic areas. The one at the 10 'o' clock position is seen tracking towards the skin near the scar.

Duct like extension are seen from some of the collections towards the nipple.

ACR BI-RADS CATEGORY II: Benign
