DR. SANJAY PATIL
M.D.(PATH)
CONSULTING PATHOLOGIST

Id. No. : 1597 Date : 29/11/05

Name : WAGHCHAURE SHWETAL

Age : Sex : Female

Ref. Dr. : ARVIND GAIKWAD BHMS

Histopathology Report

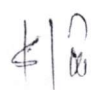

SPECIMEN NO : 1597

GROSS : Breast lump; 5x4x3 cm, capsulated, whitish, firm
rubbery, surface smooth. C/s clefts are appreciated.

MICROSCOPY : Sections show breast tissue. There is seen marked
proliferation of both glandular and connective tissue
elements. Glands are mostly lined by 2 layers of cells.
Stroma is fibroblastic & cellular appears to be more.
Mitosis is minimal.

There is no evidence of malignancy.

IMPRESSION : FIBROADENOMA OF BREAST WITH CELLULAR STROMA.
