SURGICAL PATHOLOGY REPORT

SPECIMEN

1. Left upper alveolus (received for frozen section)
2. Left buccal mucosa, posterior cut margin (received for frozen section)
3. Left buccal mucosa, anterior cut margin (received for frozen section)
4. Left buccal mucosa, inferior cut margin (received for frozen section)
5. Leukoplakia left anterior buccal mucosa (received for frozen section)
6. Wide excision of left cheek

GROSS

1. Received mucosa covered soft tissue bit measures 0.6x0.4x0.4 cms.
2. Received mucosa covered soft tissue bit measures 0.8x0.4x0.4 cms.
3. Received mucosa covered soft tissue bit measures 1.4x0.8x0.5 cms.
4. Received mucosa covered soft tissue bit measures 0.8x0.5x1.4 cms.
5. Received mucosa covered soft tissue bit measures 1.4x0.9x0.5 cms.
6. Received unoriented specimen of left cheek wide excision measures 3.0x2.0x1.2 cms. The mucosa measures 2.9x1.9 cms and reveals an ulceroinfiltrative tumor measuring 1.2x0.9 cms, cut surface of the tumor appears greyish white and appears to infiltrate to a maximum depth of 0.3 cms. The mucosal margins of resection are 0.3 to 1.1 cms away, the closest base of resection being 0.7 cms away and free of tumor grossly.
