

Patient Name: PATOLE SUVARNA MILIND

Patient ID: 079/02/2017

Patient Age: 56 Y / F

Referring doctor: DR. CHETAN DESHMUKH

Date of examination: September 2, 2017

**Examination: Ultrasound** 

## Left Axilla Ultrasound Report

## Indication:

• OP/C/O left breast cancer. Post lumpectomy status.

• Now painful lump in left axilla

An anechoic circumscribed oval lesion is noted in left axilla measuring 29 x 20.4 mm. No solid component noted. It appears bright on elastography - s/o **fluid collection**.

Multiple tiny circumscribed hypo echoic lesions are noted in subcutaneous region of left axillary tail with adjacent fat showing inflammatory changes – s/o **fat necrosis**.

No obvious hypo echoic solid mass noted in this region.

**Dr. Pooja Jere** MBBS, DMRD.
